

STATE OF NEW HAMPSHIRE

INTER-DEPARTMENT COMMUNICATION

DATE: July 1, 2015

AT(OFFICE): **P&DRS**

FROM: Paul Gildersleeve, P.E.
Civil Engineer IV
Permitting & Design Review Section

SUBJECT: Public Hearing for the Type IA Permit Modification Application for Ruggiero Processing Facility, LLC

TO: Kate Michener
Assistant Public Information Officer
Commissioner's Office

On June 25, 2015, a public hearing for the Ruggiero Processing Facility's Type IA Permit Modification Application to accept municipal solid waste and increase their capacity, was held. Paul Gildersleeve and Doug Kemp of the Solid Waste Bureau were present for the Department of Environmental Services. Rob Hitchcock of SVE Associates was present as the engineer for the applicant, Ruggiero Processing Facility, LLC.

The public hearing began with introductions, the meeting agenda, and the reading of the Notice of Public Hearing. The Notice stated that the facility is currently operating under a Standard Permit issued by the Department and is authorized to accept recyclable materials and construction demolition debris at an average weekly tonnage of 200 tons per week. This permit modification would increase the average weekly tonnage received at the facility to 400 tons per week and allow the facility to also accept municipal solid waste. It was also stated that written testimony would be accepted until 4PM on July 2, 2015. Following the reading of the Notice, the engineer for the applicant described the application. The hearing was then opened to questions and comments.

The public hearing began at approximately 6PM and ended at 6:37PM. In attendance were residences and officials of the town, including two members of the town selectboard and a selectboard secretary. Comments were wide ranging and included the need to receive town planning board approval for the proposed site plan revisions.
